Personal Cyber Security Protection Half Day

Enhance your cyber security skills with our comprehensive half-day course designed for individuals and families. Gain practical, actionable advice and access valuable resources to protect yourself and your loved ones from cyber threats.

Course Prerequisites

No prior knowledge or experience with cyber security techniques or tools is required.

Skills Acquired

- Learn best practices and tools to significantly improve your personal and family cyber security protection.
- Receive a set of course notes, a list of recommended best practices and protection tools, dice for creating Dice Passwords, and Dice Passwords code sheets.

What to bring

Pen and paper for additional notes.

What you will learn

Patching all your devices

- Importance of updating your devices when software updates occur.

Anti-Virus and Anti-malware

- Essential apps for protecting your devices.

2FA

- Importance of 2FA and why phone number, SMS, or email-based authentication is not recommended.

Internet

- Choosing the right internet browser and search engine for security.

- Evaluating the security of Private Windows.

Email

- Recommended email systems and the benefits of using multiple email accounts.

Phone

- Secure applications for SMS and encrypted phone calls.
- Tips for reducing your attack surface.

Computer

- Recommended settings for Windows 10/11 systems.
- Considerations for using Cloud backups.

Passwords

- Importance of strong passwords.
- Benefits of using a password manager.
- Creating utterly secure passwords (Dice Passwords).

Timing

Session times are customized for each group. Scheduling can be arranged at the time of booking.
